PROFESSIONAL OBJECTIVE

Senior Full Stack Engineer and Backend Architect with 9+ years of experience, specializing in the Drupal platform (7 – 11). Expert in the design, development, and optimization of complex and scalable enterprise systems, with a focus on PHP, REST APIs, databases (MySQL, PostgreSQL, MSSQL, MongoDB, Cloud Firestore), and modern DevOps/Cloud practices (AWS, Docker, Acquia Cloud). Seeking a challenging role that capitalizes on my deep Drupal experience and my growing focus on automation and cloud-native infrastructure.

KEY COMPETENCIES AS DRUPAL EXPERT AND BACKEND ARCHITECT

- **Drupal Specialization:** 9+ years of Full Stack development experience, with advanced command of Drupal (versions 8 to 11), custom module development (30+), and use of ECK entities, views, custom queries, hooks, paragraphs, blocks, services, event subscribers, queue workers, and scheduled jobs and integration of third party services.
- **Architecture and Enterprise Platforms:** Proven ability to design and present high-availability and multisite platform architectures (e.g., Drupal multisite for LACCD, Drupal high availability system for Foothill Transit) in enterprise Cloud environments (Acquia Cloud, Pantheon, AWS).
- **Optimization and Scalability:** Experience in modernizing legacy systems, migrating tens of thousands of users (e.g., Curtiss-Wright), and planning scalable architectures (e.g., MWD platform), resulting in up to 30% improvement in response times.
- **System Integration (APIs and Synchronization):** Experience integrating 4+ third-party systems (Salesforce, Solr, Auth0) and developing/consuming REST APIs. Implementation of bidirectional synchronization and massive transaction processing systems (queue-driven systems).
- **Infrastructure Management (DevOps):** 5+ years managing Linux and Windows servers on AWS (EC2, Load Balancers, CDN, auto-scaling) and implementing DevOps practices such as environment standardization and deployment automation (using Docker and Git).

TECHNICAL EXPERTISE

- **Languages:** PHP (Expert), C#, JavaScript
- **Web Platforms:** **Drupal (8-11)**, WordPress, Umbraco
- **Databases:** MySQL, PostgreSQL, MSSQL, MongoDB, Cloud Firestore.
- **Cloud & Hosting:** AWS (EC2, Load Balancers, CDN, Auto Scaling), Pantheon, Acquia Cloud, Cloudflare.
- **DevOps & Tooling:** Docker, Git, Linux, Windows, Docksal, DDEV.
- **Additional Skills:** Solution Architecture, API Development, Performance Optimization, Security Hardening, Advanced Debugging and Troubleshooting.

PROFESSIONAL EXPERIENCE

WeKnow Inc. - Senior Drupal Developer / Full Stack Developer

Nearshore Staffing & Development agency - Costa Rica. | MAR 2025 - JAN 2026

- **Key Architect** in the conceptualization of an **enterprise Drupal 11 platform** for 10+ companies and 50+ divisions, scaled on a high-availability Acquia Cloud environment.
- Developed over **30 custom Drupal modules**, utilizing ECK entities, services, event subscribers, queue workers, and scheduled jobs.

- Designed complex RBAC workflows, achieving a reduction of ~40% in manual permission management.
- Implemented a bidirectional Salesforce synchronization system for accounts and contacts, ensuring data consistency.
- Led the modernization to **Drupal 11 and PHP 8.3**, resulting in a ~30% improvement in page response times and a strengthened security posture.

Key Accomplishments

- Created a queue-driven Invoice Transaction Upload (ITU) system, processing tens of thousands of financial records per cycle and **reducing manual reconciliation time by ~70%**.
- Built a multi-company permission model that allowed users to operate across multiple organizations and roles without the need for duplicate user accounts.

D4ALL - Full Stack Web Developer

Software design and programming company - Tepic, Nayarit. México. | MAR 2019 - JAN 2024

- Led the creation of a **Drupal 10 multisite platform** (9 sites) for LACCD on Acquia Cloud, serving thousands of daily users.
- Developed a custom Drupal migration pipeline to **migrate over 20,000 users** for Curtiss-Wright Defense Solutions, ensuring data integrity and zero downtime.
- Led and delivered over 20 production web projects using **Drupal (8, 9, 10)**, WordPress, Umbraco, and custom MVC frameworks.
- Implemented and optimized backend systems with PHP, C#, MySQL, MSSQL, and AWS.
- Developed and integrated REST APIs consumed by internal systems and third-party services.

Wirefin - Full Stack Web Developer

Software design and programming company - Cuernavaca, Morelos. México. | MAY 2016 - DEC 2018

- Contributed to the development of multiple client websites using PHP, JavaScript, and relational databases.

EDUCATION

UTEL - Engineer's Degree in Computational Systems | 2013 - 2015

Free Code Camp - Full Stack Web Development Certification | 2016 - 2017

UAEM (Morelos) - Bachelor's Degree in Computer Science | 2007 - 2010
