Juan Jose Gomez Lopez

SENIOR BACKEND & CLOUD ARCHITECT

Cuernavaca, Morelos, Mexico | +52 (777) 491-46-62 | juanjose@ingomez.com
linkedin.com/in/juaningdotdev | juaning.dev

PROFESSIONAL SUMMARY

Backend and cloud architect with 9+ years in PHP and Drupal.

Career path: full-stack developer to architect for multisite and cloud platforms.

Technical scope: AWS, Acquia Cloud, CI/CD, data migrations, and performance tuning.

Engineering approach: build systems that teams can operate, maintain, and release safely.

TECHNICAL SKILLS

Architecture: Software Architecture, Backend Architecture, System Architecture, High Availability, Platform Engineering

Backend: PHP 8.x, Drupal 8-11, REST APIs, GraphQL, API Integration, Queue-Driven Architecture, Asynchronous Processing

Cloud & DevOps: Cloud Infrastructure Design, AWS (EC2, RDS, S3, ALB, CloudFront, Auto Scaling), Acquia Cloud, Docker, CI/CD, Deployment Automation, Linux, Git

Data: MySQL, PostgreSQL, Microsoft SQL Server, Cloud Firestore, Data Migration, Database Performance Tuning

Delivery & Security: Legacy Modernization, Zero-Downtime Releases, Feature Flags, Canary Releases, RBAC, Core Web Vitals

SOFT SKILLS

Leadership, Communication, Collaboration, Problem Solving, Analytical Thinking, Decision-Making, Knowledge Sharing

PROFESSIONAL EXPERIENCE

Senior Backend & Cloud Architect - Independent Consultant | Freelance / Self-Employed

Cuernavaca, Morelos, Mexico | Feb 2024 - Present

- Set the architecture for Drupal 11 and PHP 8.3 upgrades. Defined module boundaries, multisite structure, API patterns, and deployment automation.
- Automated CI/CD and queue-based processing for financial records. Cut manual processing time by at least 60%.
- Improved backend and database performance. Reduced server response times by ~25%.

Senior Software Engineer | Backend & Drupal Architect | weKnow Inc

Costa Rica - Remote | Mar 2025 - Jan 2026

- Set architecture standards for a Drupal 11 multisite platform supporting 10+ companies and 50+ divisions. Covered Acquia Cloud, RBAC, and Salesforce data synchronization.
- Built an asynchronous Invoice Transaction Upload queue that processes tens of thousands of records. Cut manual reconciliation work by 70%.
- Led PHP 8.3 upgrades and performance tuning across the division portals.

Full Stack Web Developer & Cloud Engineer | D4ALL

Tepic, Nayarit, Mexico - Remote | Mar 2019 - Jan 2024

- Built a Drupal 10 multisite platform with nine production portals for LACCD on Acquia Cloud. It served thousands of daily users and supported Canary Releases with rapid rollback.
- Created a zero-downtime migration pipeline for 20,000+ Curtiss-Wright user records while preserving data integrity.
- Standardized Docker and CI/CD workflows for the teams supporting the nine portals.

Full Stack Web Developer | Wirefin

Cuernavaca, Morelos, Mexico | May 2016 - Dec 2018

Built PHP and JavaScript applications, API integrations, and relational data models. Managed Linux production support.

EDUCATION & TRAINING

UTEL University - Computer Systems Engineering, 2013-2015

freeCodeCamp - Full Stack Web Development Certification, 2016-2017

Universidad Autonoma del Estado de Morelos (UAEM) - Computer Science studies completed; degree not awarded, 2007-2010
